

ECOTECOPOOL was founded in the year 1988 in AUROVILLE in the State of Tamil Nadu, India. We start as a swimming pool builder based on the Italian experience of our CEO. Now days one of the main activities of the company is still to build residential and commercial pool projects all over India.

Ecoteco Pools is a firm born in 1988 for building swimming pools, situated in one of the most famous touristic spots of the Coromandel Coast, a few kilometers away from Pondicherry, where water is a dominating element. Since 1988 we operate in India for the realization of the most prestigious projects, covering all the Indian territory. Under the supervision of our Italian CEO we directly import components and products for water purification, thus guaranteeing international and European standards in terms of security and quality.

With our experience we provide turnkey-projects able to satisfy every type of requirement and the ideal solution for each particular situation as well.

Each detail is work out to optimize the particular output of the single component, for swimming pool building is an art that cannot be improvised. We provide our customers with high quality products of international market standard.

Our strength lies in the ability to offer the highest standard of swimming-pool technology to the Indian market, which is still weak in this sector.

Constructing Swimming Pool

Thanks to this fruitful collaboration, a high degree of reliability and precision is guaranteed at all stages of a contract. The Indian market can now readily access the best of swimming-pool products and technology through us.

Our structures vary according to the type of soil on which the pool is built. There will be no difficulty regarding shape, size or depth, thanks to the different systems we offer, including myrtha technology and the most innovative technology in the industry. is an essential

FILTRATION is an essential operation in water treatment and is guaranteed by our range of high-efficiency filters and pumps with up-to-date pre-filters and other special components.

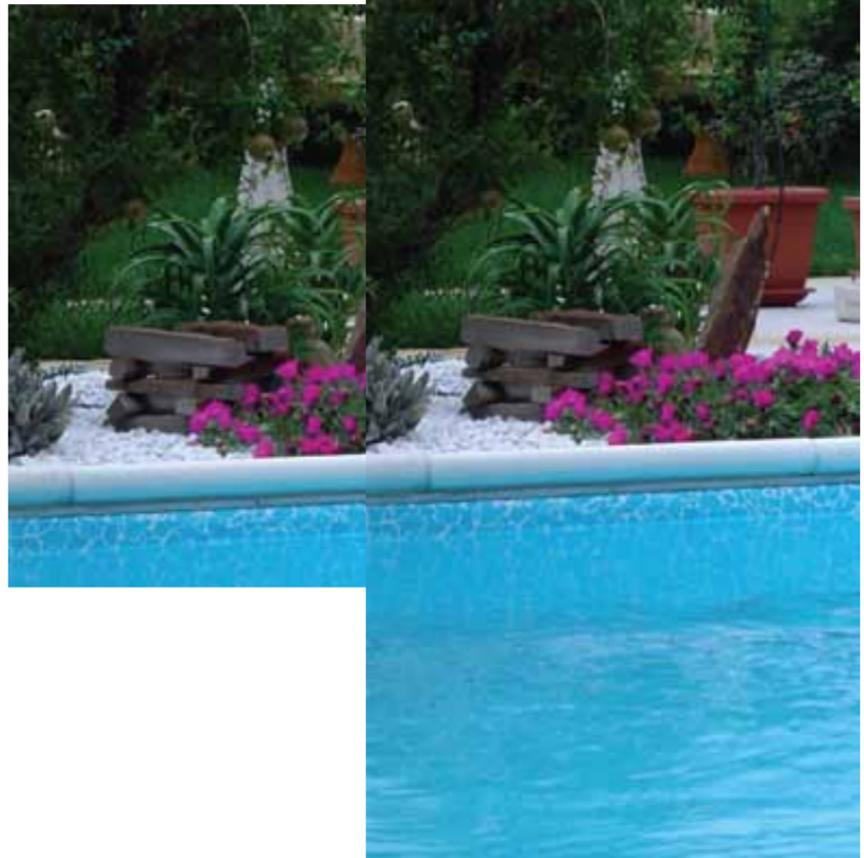

Our professional consultancy service is the result of twenty years of experience in Europe and ten years in India. Numerous projects have been carried out most reliably and professionally in many parts of the Indian Republic.

We offer our technical and professional inputs for the design and style of the pool, be it modern or any other of your choosing.

After building, installing the best operating system for your swimming pool and commissioning it, we also offer a maintenance service in order to keep it efficient, functional and up-to-date with the latest innovations in the sector.

We provide ready-made solutions to form a complete package. These include design, construction, supply and installation of all special components as well as an annual maintenance service contract that will ensure efficient and trouble free running of the entire system.

We are available for any query or information regarding our services and for a quick and detailed estimate of your requirements. Do contact us.
